

SIDDHANT MAURYA

Engineering Intern Candidate — Backend / Full-Stack

☎ +91-9911284767 ✉ sidhantmaurya1403@gmail.com 💼 linkedin.com/in/sidhantm1403 🐙 github.com/SidM1403

Summary

Full-Stack / Backend Developer with strong **Data Structures & Algorithms** fundamentals and hands-on ownership of **three production-ready full-stack applications** shipped end-to-end — REST API design, microservices architecture, **PostgreSQL/MongoDB** data layers, **Docker** containerization, and **GitHub Actions CI/CD** pipelines. Comfortable working in AI-assisted engineering workflows — building daily with **Claude and Antigravity** — and has integrated LLM-powered features (**OpenRouter AI, RAG pipelines**) directly into production systems. Builds with a systems-thinking mindset — **Redis** caching for low-latency APIs, real-time sync, and JWT-secured, containerized services — and is quick to own features from concept to production in fast-paced, minimal-specification environments.

Skills

Languages & CS Fundamentals: C++, Python, JavaScript, TypeScript, SQL, Data Structures & Algorithms, OOP

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, Microservices, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS, Docker, CI/CD (GitHub Actions), Git/GitHub

Frontend: React.js, Next.js, Tailwind CSS

AI / LLM Integration: OpenRouter AI, Groq AI, RAG Pipelines, LLM Feature Integration

AI-Assisted Development: Claude, Antigravity

Experience

Data Labeling Analyst Intern

Nov 2025

Forage (Virtual Internship Program)

Remote

- Labeled and quality-reviewed **100+ customer support records** for intent classification, sentiment analysis, and PII compliance, applying annotation guidelines relevant to regulated, fintech-grade systems.

Projects

SavePoint | *React.js, Node.js, PostgreSQL, Redis, OpenRouter AI* | [GitHub](#)

Jul 2026

- Built a responsive full-stack gaming library platform on the **PERN stack**, utilizing **Redis** to cache external IGDB API queries and drastically minimize latency for concurrent searches.
- Engineered a personalized discovery engine integrating **OpenRouter AI**, synthesizing user moods and historical PostgreSQL library data to deliver context-aware game recommendations.

PotholeSense | *Python, FastAPI, RAG, OpenCV, REST APIs*

Jun 2026

- Built a **computer-vision pipeline** to detect and classify potholes from road images using Python, exposing predictions to clients through a **FastAPI** backend with REST endpoints.
- Implemented a lightweight **RAG pipeline** over historical maintenance records to auto-generate contextual severity summaries and repair-priority reports for detected road damage.

Revisly | *Next.js, TypeScript, OpenRouter AI, Vercel Edge Functions* | [GitHub](#)

May 2026

- Built a **zero-infrastructure, full-stack AI study application** using **Next.js**, engineering a client-side document parsing pipeline via **WebWorkers** to eliminate server upload costs and minimize processing latency.
- Implemented a lag-free **spaced-repetition flashcard engine** utilizing **IndexedDB**, and integrated **OpenRouter AI** via **Vercel Edge Functions** to dynamically generate strict JSON-structured MCQs and study guides with zero cold-starts.

Certifications

• Oracle AI Foundations Associate Certification

Oracle, Jun 2026

• Microsoft Certified: SQL AI Developer Associate

Microsoft, Jul 2026

• Meta Back-End Developer Professional Certificate

Meta / Coursera, Apr 2026

Achievements

- **Hackathon: Top 5 Finalist** — led a team of 4 in the Hack-IOT Hackathon (Feb 2024).
- **LeetCode:** 100+ problems solved, reinforcing DSA and problem-solving skills.
- **Microsoft GitHub Foundations Certified:** proficient in Git, GitHub, and version control workflows.

Education

Lovely Professional University

Aug 2023 – May 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering; CGPA: 7.6

Punjab, India

Mount Litera Zee School

Apr 2022 – May 2023

PCM Intermediate: 74% · Matriculation: 94%

Vasco, Goa
